(Electric power company)

It is a government website specialized in inquiring about citizens' bills. This website is directed to citizens who subscribed to the electricity service. Also, through this website, the user can request a new subscription and send complaint instead of going to any branch of the electricity company, so this website is designed to serve citizens.

Scope:

Through this website, the users can:

- ✓ Inquire about his bill by filling in his information and the required money will show to the user.

- ✓ Request a new subscription to benefit from the services by filling in a form containing information about the request data and personal information.

- ✓ Sending a complaint to the company by filling in his information and description about the complain to express poor service or a technical error in the website.

Requirements :

- ✓ User can show his bill by entering his information and information about his subscription and the amount of required money will show.

- ✓ User can send new subscription to get new services by entering his information and information related to the request data.User can visit

- ✓ User can visit the website's social media platforms by pressing the button of the specific platform below the site.

- ✓ User can call the company customer service by using the phone number at the top of the page.

- ✓ User can add his information in the website to benefit from the services.
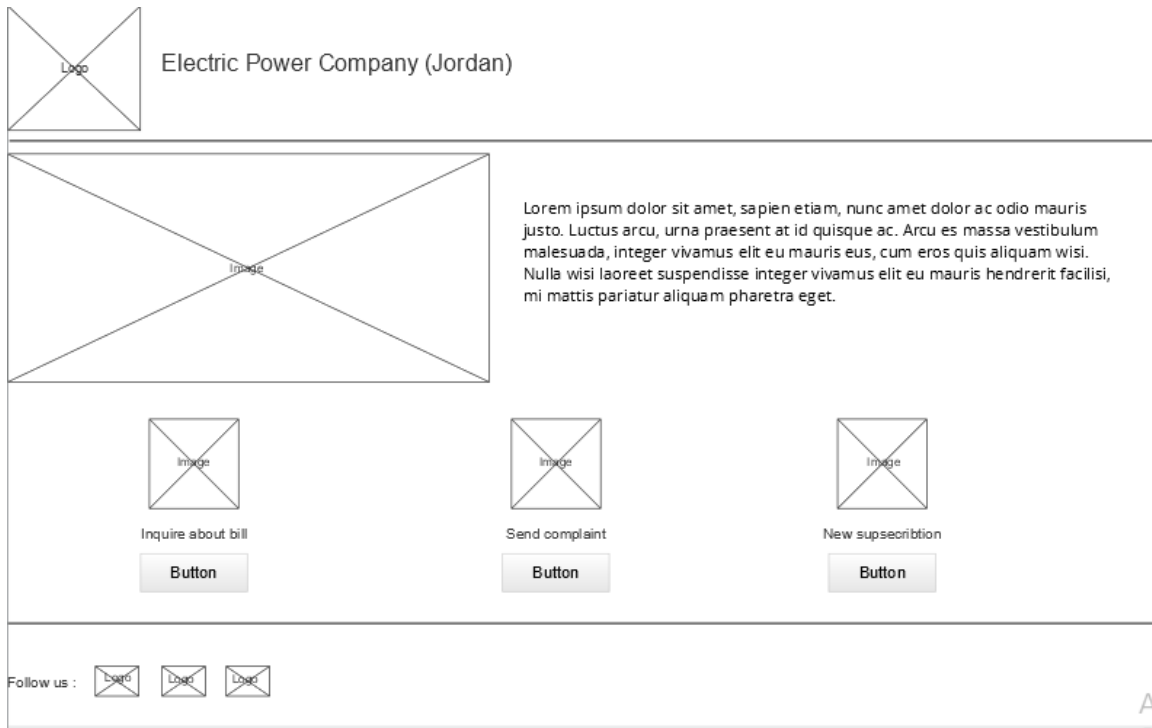

[Sitemaps :](#)

It's the structure of your webpages that are in the website and the relation ship between the webpages, and it required to be done before write the code, for example in my project, I made a sitemap of my website by using many tools such as:

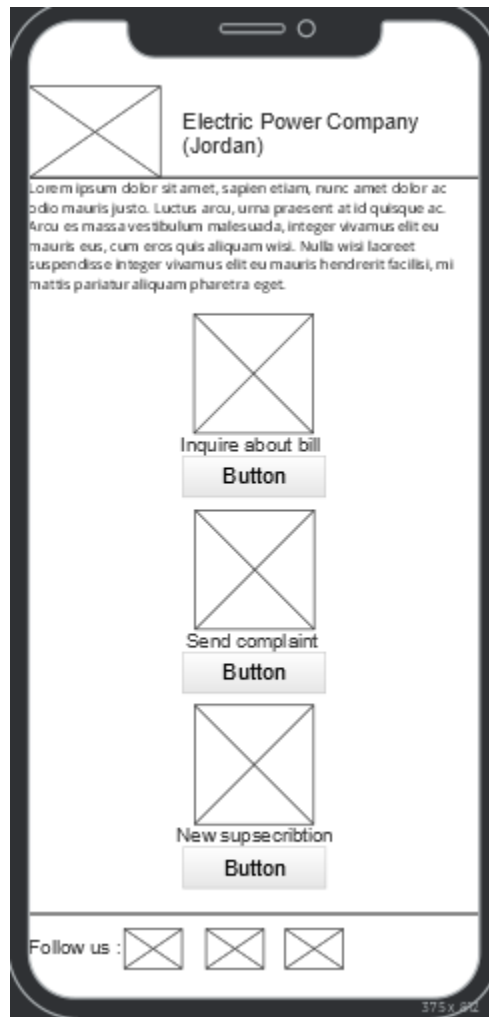

[Wire frame:](#)

It's an overview of the content (paragraphs, images, videos, links, etc..)of the web pages in the website by using tools to create it, wireframes must fit all the sizes of the screen for example if we want to do a wireframe to a web page, we need to make two wireframes: one for the laptop screen and one for phone screen and the two screens must includes the content of each page and the position of each element(p,img,videos,etc...). Note:Wireframes must comes before writing the code and Wireframe screen must comes with black and white only not a colorful screen.
